

Developer Portfolio

(1st Capstone Project)

Create your own Web Developer Portfolio using
HTML, CSS and Bootstrap

Specific Requirements

WDC028-S13 - Capstone 1 Development - Developer Portfolio

Specific Requirements

- General Page Styles
 - Custom web page font style using **Google Fonts**.
 - Add text and background colors to give your web page more life.
- The page should maintain its **responsiveness** on three types of devices (mobile, tablet and desktop).

Reminders

WDC028-S13 - Capstone 1 Development - Developer Portfolio

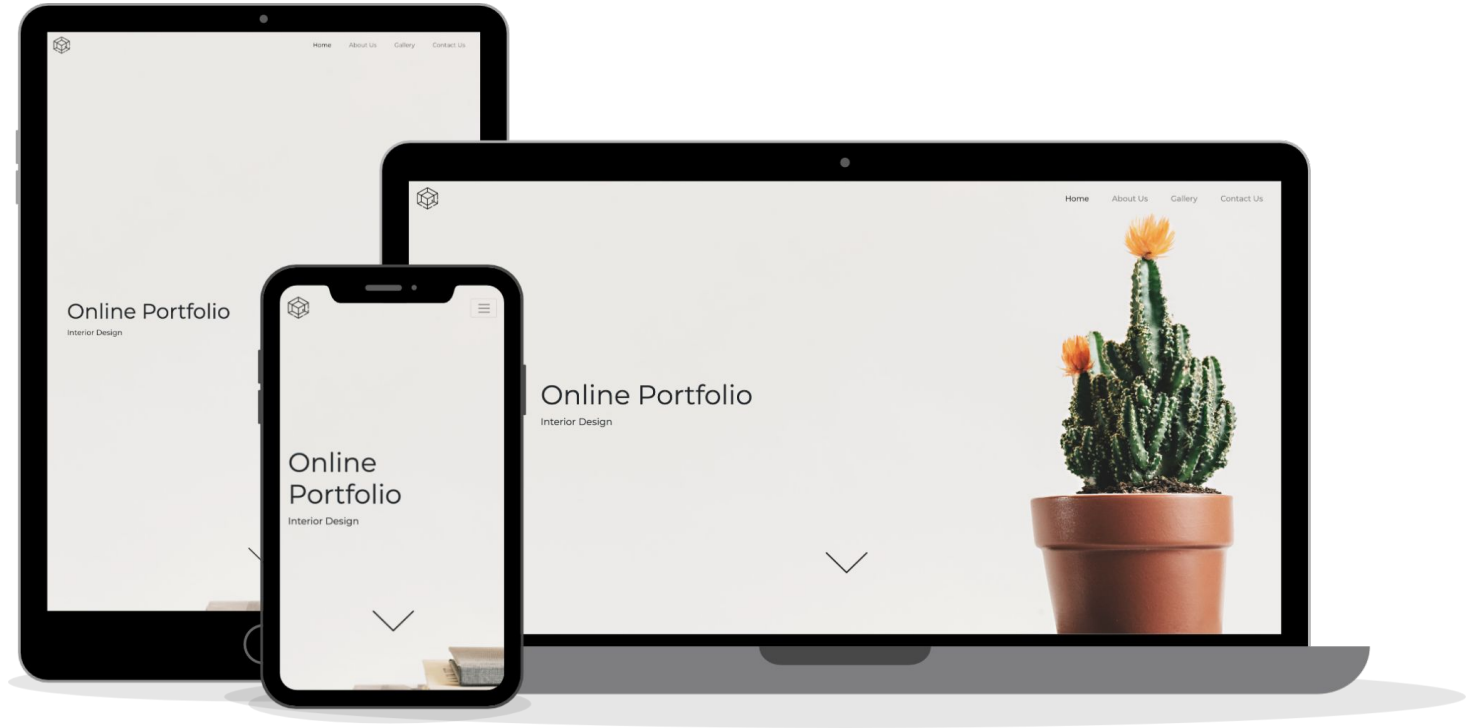

- All CSS code must be in an **external CSS file**.
- There should be **no
 elements** in the source code.
- There should be **no inline or internal CSS code**.
- There should be **no default web page fonts** (Times New Roman).
- There should be **no placeholder text** in the page (like the Lorem Ipsum).

- There should be **no horizontal scrolls** when viewing the page.
- There should be **no dead links**.
- **Do not create another website** other than the required developer portfolio.
- **Do not use templates** found in other sites.

The screenshot shows a web page titled "Contact Us" with a navigation bar at the top containing links for Home, About Us, Gallery, and Contact Us. The main content area features a dark gray contact form with the following elements:

- Full Name**: A text input field with the placeholder "Full Name".
- Email**: A text input field with the placeholder "Email".
- Your Message**: A large text area for the message.
- Send**: A blue button to submit the form.

The footer of the page contains the following text:
